

Energy Efficiency: The Savvy Property Owners' Secret Advantage

Upgrades to lighting, heating, ventilation, and water systems give your rental property operational savings and long term stability. Not only will efficiency projects save money on energy, they can increase tenant comfort, building aesthetics, and property value.

- ✓ Increase tenant retention
- ✓ Lower utility bills for you, or your tenants
- ✓ Offer tenants an energy efficient space
- ✓ Reduce maintenance costs

Efficiency Vermont offers many ways for multifamily property owners to improve the efficiency of their buildings, from low cost measures to comprehensive projects.

\$

Simple
Upgrades

Simple measures like LED bulbs and water conservation devices can reduce tenant utility bills by \$10/month, increasing their ability to pay rent

\$\$

Moderate
Renovation

Your local contractor network can deliver Efficiency Vermont rebates and discounts on heating, ventilation, and water system replacement projects

\$\$\$

Substantial
Improvements

Cash incentives from Efficiency Vermont can pay for a large portion of weatherization measures if 51% of units are occupied by income-eligible renters
